

CNC Machining

CNC Machining:

Under the one roof of Mukta Group, we are capable to supply quality CNC machining services to our reputed customer. CNC precision machining expertise is recognized nationwide for metal machining.

Our most requested jobs include center less, cylindrical, round operations.

Mukta Group has been a manufacturer of turned products since 1994 and continues to supply automotive, & bearing industry. We offer the best machining process to achieve the quality and cost economies across a broad range of production requirements.

When production requirements are very precise, designs are complex, or lead times are short, the CNC lathe will have a distinct advantage over older technologies.
