

Forged Rings

Inner & Outer Bearing Races:

We are instrumental in designing and developing a sturdy range of inner and outer bearing races that are used for roller bearings, spherical bearings, cylindrical bearings, ball bearings and taper roller bearings. These bearing races are innovatively designed to exhibit close dimensioned tolerances. The Sizes for Bearings Races are ranging from Minimum Inner Diameter(ID) of 35 MM to Maximum Outer Diameter(OD) of 400 MM.

Bearing Races

We have been manufacturing quality Forged Bearing Races with application of best available raw materials in steel Grade SAE 52100 and strict quality control. Our innovative engineering and tradition of precision has kept us a step forward in Forging.
